PII: S0301-9322(98)00068-8

LIST OF CONTENTS

Number 1

J. Guitián and **D. Joseph**	1	How bubbly mixtures foam and foam control using a fluidized bed
F. de Cachard and **J. M. Delhaye**	17	Stability of small diameter airlift pumps
V. Roig, C. Suzanne and **L. Masbernat**	35	Experimental investigation of a turbulent bubbly mixing layer
B. Mols and **R. V. A. Oliemans**	55	A turbulent diffusion model for particle dispersion and deposition in horizontal tube flow
M. Soltani, G. Ahmadi, H. Ounis and **J. B. McLaughlin**	77	Direct simulation of charged particle deposition in a turbulent flow
E. Salinas-Rodríguez, R. F. Rodríguez, A. Soria and **N. Aquino**	93	Volume fraction autocorrelation functions in a two-phase bubble column
J. F. Morris and **J. F. Brady**	105	Pressure-driven flow of a suspension: buoyancy effects
V. Bontozoglou and **G. Papapolymerou**	131	Wall-triggered interfacial resonance in laminar gas–liquid flow
Y. C. Kweon, M. H. Kim, H. J. Cho and **I. S. Kang**	145	Study on the deformation and departure of a bubble attached to a wall in D.C./A.C. electric fields
Announcement	163	

Number 2

G. Hetsroni, B. G. Hu, J. H. Yi, A. Mosyak, L. P. Yarin and **G. Ziskind**	165	Heat transfer in intermittent air–water flows—Part I—Horizontal tube
G. Hetsroni, J. H. Yi, B. G. Hu, A. Mosyak, L. P. Yarin and **G. Ziskind**	189	Heat transfer in intermittent air–water flows—Part II—Upward inclined tube
J. R. Fan, X. Y. Zhang, J. Jin, Y. Q. Zheng and **K. F. Cen**	213	Turbulent fluid and particle interaction in the boundary layer for cross flow over a tube

R. M. Turian, T.-W. Ma, F.-L. G. Hsu and D.-J. Sung — 225 — Flow of concentrated non-Newtonian slurries: 1. Friction losses in laminar, turbulent and transition flow through straight pipe

R. M. Turian, T.-W. Ma, F.-L. G. Hsu, D.-J. Sung and G. W. Plackmann — 243 — Flow of concentrated non-Newtonian slurries: 2. Friction losses in bends, fittings, valves and Venturi meters

J. D. Bugg, K. Mack and K. S. Rezkallah — 271 — A numerical model of Taylor bubbles rising through stagnant liquids in vertical tubes

S. G. Yiantsios and A. J. Karabelas — 283 — The effect of gravity on the deposition of micron-sized particles on smooth surfaces

T. W. Park, V. R. Katta and S. K. Aggarwal — 295 — On the dynamics of a two-phase, nonevaporating swirling jet

N. Hoyer — 319 — Calculation of dryout and post-dryout heat transfer for tube geometry

D. I. Graham — 335 — Improved eddy interaction models with random length and time scales

Brief Communication

M. O. Carpinlioglu and M. Y. Gundogdu — 347 — An experimental approach for the determination of development length in particulate flows

Announcements — 355

Number 3

D. Kaftori, G. Hetsroni and S. Banerjee — 359 — The effect of particles on wall turbulence

D. Juric and G. Tryggvason — 387 — Computations of boiling flows

J. W. M. Bush and I. Eames — 411 — Fluid displacement by high Reynolds number bubble motion in a thin gap

H. Cheng, J. H. Hills and B. J. Azzorpardi — 431 — A study of the bubble-to-slug transition in vertical gas-liquid flow in columns of different diameter

R. Prud'homme, L. Gottesdiener, E. Dodemand and P. Kuentzmann — 453 — Asymptotic analysis of vortex flows in suspensions

H. J. Cho, I. S. Kang, Y. C. Kweon and M. H. Kim — 479 — Numerical study of the behavior of a bubble attached to a tip in a nonuniform electric field

A. A. Boateng 499 Boundary layer modeling of granular flow in the transverse plane of a partially filled rotating cylinder

Number 4

M. Iguchi, K. Okita and **F. Yamamoto** 523 Mean velocity and turbulence characteristics of water flow in the bubble dispersion region induced by plunging water jet

N. Hatta, H. Fujimoto, M. Isobe and **J.-S. Kang** 539 Theoretical analysis of flow characteristics of multi-phase mixtures in a vertical pipe

M. B. Salem and **B. Oesterle** 563 A shear flow around a spinning sphere: numerical study at moderate Reynolds numbers

T. Fukano and **T. Furukawa** 587 Prediction of the effects of liquid viscosity on interfacial shear stress and frictional pressure drop in vertical upward gas–liquid annular flow

P. H. Son and **K. Ohba** 605 Theoretical and experimental investigations on instability of an electrically charged liquid jet

N. Reinecke, G. Petritsch, M. Boddem and **D. Mewes** 617 Tomographic imaging of the phase distribution in two-phase slug flow

K. N. Agrawal, A. Kumar, M. A. Akhavan Behabadi and **H. K. Varma** 635 Heat transfer augmentation by coiled wire inserts during forced convection condensation of R-22 inside horizontal tubes

S. V. Paras, N. A. Vlachos and **A. J. Karabelas** 651 LDA measurements of local velocities inside the gas phase in horizontal stratified/atomization two-phase flow

J. S. Shirolkar and **M. Q. McQuay** 663 Probability density function propagation model for turbulent particle dispersion

Brief Communications

R. Balasubramaniam 679 Thermocapillary and buoyant bubble motion with variable viscosity

A. Crespo, E. Migoya and **F. Manuel** 685 Thermocapillary migration of bubbles at large Reynolds numbers

Number 5

J. L. Best 693 The influence of particle rotation on wake stability at particle Reynolds numbers, Re_p 300—implications for turbulence modulation in two-phase flows

P. Satyamurthy, N. S. Dixit, T. K. Thiyagarajan, N. Venkatramani, A. M. Quraishi and A. Mushtaq — 721 — Two-fluid model studies for high density two-phase liquid metal vertical flows

J. M. Masella, Q. H. Tran, D. Ferre and C. Pauchon — 739 — Transient simulation of two-phase flows in pipes

H. Asheim and E. Grdal — 757 — Holdup propagation predicted by steady-state drift flux models

L. C. Walters, H. M. Soliman and G. E. Sims — 775 — Two-phase pressure drop and phase distribution at reduced tee junctions

Y. Hao and S. Haber — 793 — Electrophoretic motion of a charged spherical particle normal to a planar dielectric wall

M. J. S. King, C. P. Hale, C. J. Lawrence and G. F. Hewitt — 825 — Characteristics of flowrate transients in slug flow

Brief Communication

Sung-Jae Lee, Keun-Shik Chang and Kyungdoo Kim — 855 — Pressure wave speeds from the characteristics of two fluids, two-phase hyperbolic equation system

Number 6

K. Fukagata, S. Zahrai and F. H. Bark — 867 — Force balance in a turbulent particulate channel flow

W.-H. Chou and G. M. Faeth — 889 — Temporal properties of secondary drop breakup in the bag breakup regime

J. Pozorski and J.-P. Minier — 913 — On the Lagrangian turbulent dispersion models based on the Langevin equation

J. Bonjour and M. Lallemand — 947 — Flow patterns during boiling in a narrow space between two vertical surfaces

A. C. Bannwart — 961 — Wavespeed and volumetric fraction in core annular flow

N. Brauner, D. Moalem Maron and J. Rovinsky — 975 — A two-fluid model for stratified flows with curved interfaces

R. Bürger and F. Concha — 1005 — Mathematical model and numerical simulation of the settling of flocculated suspensions

R. S. Miller, K. Harstad and J. Bellan 1025 Evaluation of equilibrium and non-equilibrium evaporation models for many-droplet gas-liquid flow simulations

Number 7

M. Creutz and D. Mewes 1057 A novel centrifugal gas–liquid separator for catching intermittent flows

M. Chen, K. Kontomaris and J. B. McLaughlin 1079 Direct numerical simulation of droplet collisions in a turbulent channel flow. Part I: collision algorithm

M. Chen, K. Kontomaris and J. B. McLaughlin 1105 Direct numerical simulation of droplet collisions in a turbulent channel flow. Part II: collision rates

Yu. Ya. Trifonov 1139 Viscous liquid film flows over a periodic surface

T. Elperin, N. Kleeorin and I. Rogachevskii 1163 Formation of inhomogeneities in two-phase low-Mach-number compressible turbulent fluid flows

P. Angeli and G. F. Hewitt 1183 Pressure gradient in horizontal liquid–liquid flows

J.-W. Park, D. A. Drew, R. T. Lahey, Jr. 1205 The analysis of void wave propagation in adiabatic monodispersed bubbly two-phase flows using an ensemble-averaged two-fluid model

Number 8

X. Cheng and U. Müller 1245 Critical heat flux and turbulent mixing in hexagonal tight rod bundles

A. Cartellier and E. Barrau 1265 Monofiber optical probes for gas detection and gas velocity measurements: conical probes

A. Cartellier and E. Barrau 1295 Monofiber optical probes for gas detection and gas velocity measurements: optimised sensing tips

G. P. Xu, C. P. Tso and K. W. Tou 1317 Hydrodynamics of two-phase flow in vertical up and down-flow across a horizontal tube bundle

J. Wu and R. Manasseh 1343 Dynamics of dual-particles settling under gravity

D. M. Snider, P. J. O'Rourke and M. J. Andrews 1359 Sediment flow in inclined vessels calculated using a multiphase particle-in-cell model for dense particle flows

A. Tokuhiro, M. Maekawa, K. Iizuka, K. Hishida and M. Maeda 1383 Turbulent flow past a bubble and an ellipsoid using shadow-image and PIV techniques

C. H. Newton and **M. Behnia** 1407 On the use of the stratified momentum balance for the deduction of shear stress in horizontal gas–liquid pipe flow
